Policy Type (Operating, Board)	Operating

A. Purpose

To set forth the provisions that must be followed when administering medication and performing medical treatments or procedures to students at school.

B. Definitions

C. Policy Statement

GENERAL STATEMENT OF POLICY

TrekNorth acknowledges that some students may require prescribed drugs or medications or medical treatments or procedures during the school day. The District’s trained administrator, teacher, or other designated staff will administer prescribed medications or perform medical treatments or procedures in accordance with law and District procedures.

REQUIREMENTS

A. The administration of medications, drugs, medical treatments or procedures at school requires a completed signed request from the student’s parent/guardian and the licensed health care provider*. An oral request must be reduced to writing within two school days.

B. TrekNorth Student Medication form must be completed annually (at the start of every school year, or when a new student enrolls) and/or when a change in the prescription or requirements for administration occurs.

C. Prescription and over-the-counter medication must come to school in the original container. Prescription medication must be labeled for the student by a pharmacist in accordance with law, and must be administered in a manner consistent with the instructions on the label.

D. Operations Manager or Administration may request to receive further information about the prescription, if needed, prior to administration of the substance.

E. Prescription medications are not to be carried by the student, but will be left with Operation Manager or Administration. Exceptions to this requirement are: Self-administered prescription medications such as an asthma inhaler or epinephrine auto injector (see part J.5 & 6 below), or medications administered as noted in a written agreement between the school district and the parent /guardian or as specified in an IEP (individualized education program), Section 504 plan, ECP (emergency care plan), or IHP (individual health plan)

F. The school must be notified immediately by the parent /guardian or student 18 years old or older in writing of any change in the student's prescription medication administration. A new medical authorization or container labeled with new pharmacy instructions shall be required immediately as well.

G. For drugs, medications, medical treatments or procedures used by children with a disability, administration may be as provided in the IEP, Section 504 plan, ECP, or IHP.

H. Operations Manager or other staff designated shall be responsible for the filing of the TrekNorth Student Medication form in the health records section of the student file. Operations Manager, or other designated person staff, shall be responsible for providing a copy of such form to the Executive Director, Special Education Director, or other staff designated to administer the medication, treatment, or procedure.

I. Procedures for administration of drugs, medications, treatments, or procedures at school and school activities shall be developed in consultation with a school nurse a licensed school nurse, or a public or private health organization or other appropriate party (if appropriately contracted by the school district under Minn. Stat. § 121A.21).

J. Specific Exceptions: Self-Carry and Self-Administration

1. Emergency health procedures, including emergency administration of drugs, medications, treatments, and procedures are not subject to this policy;

2. Drugs, medications, treatments, and procedures provided or administered by a public health agency to prevent or control an illness or a disease outbreak are not governed by this policy;

3. Drugs, medications, treatments, and procedures used at school in connection with services for which a minor may give effective consent are not governed by this policy;

4. Drugs or medicines that are prescription asthma or reactive airway disease medications can be self-administered by a student with an asthma inhaler if:

a) the school district has received a written authorization from the pupil's parent / guardian permitting the student to self-administer the medication;

b) the inhaler is properly labeled for that student; and

c) the parent / guardian has not requested school personnel to administer the medication to the student; and the student has shown that they know how to properly self-administer the medication.

The parent / guardian must submit written authorization for the student to self-administer the medication each school year. The student's parent or guardian must submit written verification from the licensed health care provider, which documents that an assessment of the student's knowledge and skills to safely possess and use an asthma inhaler in a school setting has been completed.

5. Nonprescription Medication. A secondary student may possess and use nonprescription pain relief in a manner consistent with the labeling, if the school district has received written authorization from the student's parent or guardian and licensed health care provider permitting the student to self-administer the medication. The parent or guardian must submit written authorization for the student to self-administer the medication each school year. The district may revoke a student's privilege to possess and use nonprescription pain relievers if the district determines that the student is abusing the privilege. This provision does not apply to the possession or use of any drug or product containing ephedrine or pseudoephedrine as its sole active ingredient or as one of its active ingredients. Except as stated in this paragraph, only prescription medications are governed by this policy.

6. Prescription Medication. A student may not possess and use prescription medications. In the case of a disagreement regarding a student's self-carrying and self-administration of a medication, a meeting should be held with all involved parties, and a plan developed, keeping as a priority the student's educational goals and health safety.

7. Medical Cannabis: Schools may not use an individual's status as a registered medical marijuana patient as a reason to refuse enrollment. Possession or use of medical cannabis is not permitted in the following areas: on a school bus or van; on the grounds of any preschool, primary, or secondary school or at any school sponsored event or field trip. Parents and guardians are urged to discuss with their licensed health care provider how to handle administering medical cannabis away from the school setting. (Minn. Stat. § 152.22- 152.37)

8. At the start of each school year or at the time a student enrolls in school, whichever is first, a student's parent / guardian, school staff, including those responsible for student health care, must develop and implement an individualized written health plan for a student who is prescribed epinephrine auto-injectors that enables the student to:

a) possess epinephrine auto-injectors; or

b) if the parent / guardian and licensed health care provider determine the student is unable to possess the epinephrine, have immediate access to epinephrine auto-injectors in close proximity to the student at all times during the instructional day. The plan must designate the school staff responsible for implementing the student's health plan, including recognizing anaphylaxis and administering epinephrine auto-injectors when required, consistent with state law. This health plan may be included in a student's § 504 plan.

This policy may be revised at any time without notice. All revisions supersede prior policy and are effective immediately upon approval by the Director.

D. Associated Procedures or Other Information

**TrekNorth Junior & Senior High School
Medication Form**

Student Name/Grade: _____

Parent/Guardian: _____ **Phone:** _____

Prescription Medication:

Parents/guardians of students requesting prescription medications to be given to their child during school hours by school staff are required to provide the school with the following:

- 1, The doctor's order (one of the following meets the requirement).
